

The Materials Metrology™ Company

Press Release

## ReVera Announces New Corporate Headquarters Location

---

**Santa Clara, Calif., December 8, 2008** – ReVera Incorporated, a leading innovator of advanced materials metrology systems for the semiconductor industry, announced today that it has moved its corporate headquarters to Santa Clara, CA. Citing the need to expand its development and manufacturing facilities, CEO Dave Ring commented, “With the increase in business and activity arising from ReVera’s key role enabling our customers to develop High K transistor gate stacks, ReVera has moved to a larger facility with improved development and manufacturing capacity. Our new location in Santa Clara, California enhances our ability to meet our customers’ needs and keeps us centered in the heart of Silicon Valley.”

ReVera’s new facility is located at:

ReVera Incorporated  
3090 Oakmead Village Drive  
Santa Clara, CA 95051  
Telephone: 408-510-7400  
Fax: 408-510-7401

### **About ReVera Incorporated**

ReVera Incorporated is a leading provider of materials metrology solutions for advanced semiconductor processing. Its products allow device manufacturers to measure, monitor and control critical materials properties, enabling them to rapidly integrate and manage the new materials required for 45 nm, 32 nm and beyond. ReVera systems are proven in production in a broad range of applications, and are backed by a global network of applications, field service, sales and logistics personnel. ReVera was established in 2004 as a management-led spin-out from Physical Electronics and its wholly owned subsidiary, Charles Evans and Associates.
